**DETAILED ACTION**

This application filed 06/26/2006 is a 371 of PCT/JP04/19742 12/24/2004.

Claims 1-18 and 27 (claims 19-26, 28-41 cancelled) are before the Examiner and subject to the following Election/Restriction.

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-18, drawn to compounds of formula 1 wherein R2 is substituted or unsubstituted phenyl.

Group 2 claim(s) 1-18, drawn to compounds of formula 1 wherein R2 is substituted or unsubstituted heterocyclic. Election of this group would necessitate further restriction based on the heterocyclic R2 variant.

Group 3, claims 1-18, drawn to compounds of formula 1 not encompassed by compounds of Group 2 and 3. Election of this group would necessitate further restriction.

Group 3, claim(s) 27, drawn to pharmaceutical method of use of compounds.

The inventions listed as Groups 1-3 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for

the following reasons: the special technical feature in all the claims, the core structure of Olevitol (CAS NUMBER: 500-66-3) is well known and thus is not a contribution over the prior art.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction were not required; because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
